

Post Event Summary Report

Event	ALIAS Summer of Code
Speakers	—
Date	September - October 2023
Venue	Online
Timings	—

Overview:

ALIAS Summer of Code was a month-long program where students from in and outside Amity were onboarded for mentorship under experienced mentors to work on ALIAS's own open source projects and others.

The aim of this program is to prepare students for prestigious open source programs like Google Summer of Code, Outreachy, MLH fellowship etc.

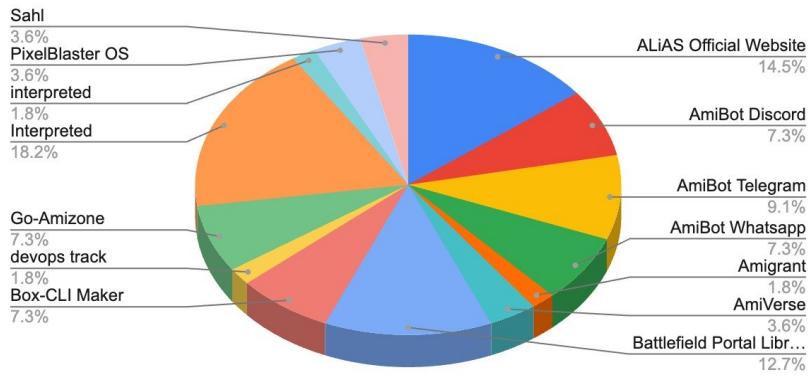

The program was officially supported by the FOSS United Foundation, backed by Zerodha.

The program included an offline talk during the ALIAS Kickstart event and PyDelhi conference, then interested mentees created and submitted a project proposal for the project they wanted to contribute to.

The project list included:

1. Amibot whatsapp
2. Amibot Discord
3. Amibot Telegram
4. ALIAS Website
5. Amiverse
6. Interpreted
7. Sahl
8. Bfportal
9. PixelblasterOS
10. Box CLI Maker

Proposals distribution

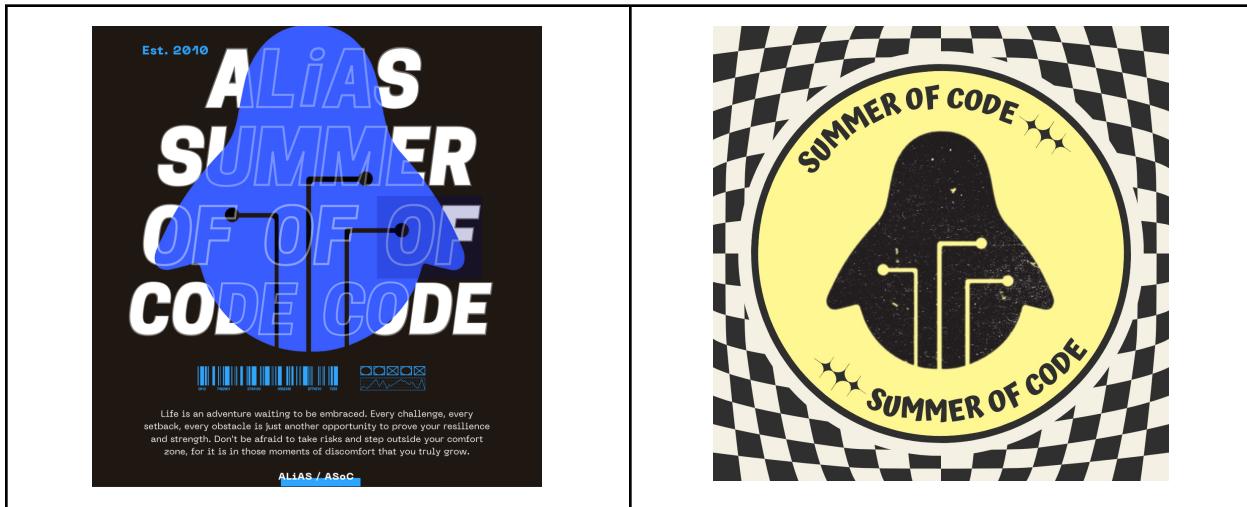

More than 50 students applied for the program, after careful selection and review of the proposals 24 students were selected.

The mentorship occurred over the month of September on the ASoC Discord channels.

Apart from this ASoC also saw a design-a-thon, a contest for ALIAS members where they showed their creativity in creating tshirt and sticker designs for ASoC.

The winning designs were:

Made by Rishika Singh, First year Btech Computer science and engineering.

ASoC received incredibly positive feedback from the mentors and mentees involved.

ASoC Designathon

Your design could be the face of ALIAS Summer of Code 2023.

ALIAS Summer of Code is looking for a creative and innovative design to represent their program. To capture the spirit of the program, the design must reflect the essence of ALIAS, which is a passionate and driven group of individuals committed to making a positive impact through technology. The design should be visually appealing and easily recognizable with a modern and fresh feel. It should represent the diversity of the ALIAS community and convey a sense of inclusivity and belonging. The selected design will be featured on all promotional materials, including t-shirts, posters, and social media promotions. This is a great opportunity for designers to showcase their skills and contribute to a meaningful cause. So, put on your thinking caps and let your creativity shine.

Winner gets their own tshirt!

ASoC website

The screenshot shows the ASoC website homepage. At the top, there's a navigation bar with links for 'Register as mentee →', 'Blogs', and 'Search'. On the left, a sidebar menu includes 'Introduction' (which is currently selected), 'Guidelines', 'Participate', 'Projects', 'FAQ', 'Sponsors', 'Other Programs', 'Contact Us', and 'Contributors'. The main content area has a heading 'About ASoC' and a paragraph about the program's mission. It also features sections for 'Overview' and 'Can't wait?'. On the right, there's a sidebar titled 'On This Page' with links to 'Overview', 'Program Timeline', 'Registration Period', 'Mentee Selection Period', 'Habituation Period', 'Contribution Period', 'Evaluation Period', 'Program Conclusion', and 'Rewards and Recognition'. At the bottom right, there are links for 'Question? Give us feedback →' and 'Edit this page'.

ASoC Discord server:

The screenshot shows a Discord channel named '#interpreted'. The channel interface includes a sidebar with categories like 'ALIAS SUMMER OF CODE' and 'PROJECTS'. The main window displays a message from user '@Soham Kukreti' at 10/22/2023 10:53 AM, explaining a Python interpreter bug related to global variable assignment. Other messages from users 'Tushar Sadhwani' and 'Soham Kukreti' follow, discussing the issue and its resolution. The bottom of the screen shows the standard Discord message input field and various status icons.

ASoC was a nice experience. Found a bunch of really smart students, and mentoring them was really fun.

Big ups to **Sameer**, **Soham** and **Yuvraj**, you did great.

You and 15 others
